Subject: NL Auto Insurance Story

I moved to NL from NS in 2012. A year afterwards, my insurance went up considerably. I've never had a claim or accident. When I contacted my insurance company, they told me it was because it had been too low compared to other Canadian provinces beforehand, and they were increasing it to make it comparable to the rest of Canada. Sounded bogus- why am I being penalized for their mistake? After shopping around, I realized all the insurance companies were outrageous!
