Subject: Refund of Rate Stabilization Plan Surplus

Good evening,

I have been listening to the news recently and strongly disagree with Newfoundland Power taking 3.6 million dollars to administer the issuance of the refund cheque to all it's customers.

As I see it, the refund can be simply added to all our power bills as a credit. No need to write individual cheques to all residents. I do not want to see any money paid out to Newfoundland Power from this fund, to refund us our money.
