

1 Q. **Specifically Assigned Charges**

2 With the reference to Volume I, Table 5.6 and section 5.3.3 please provide details  
3 how much of the change in Specifically Assigned Charges relate to the change in  
4 methodology of Allocation of Operating and Maintenance Costs to Specifically  
5 Assigned Assets and how much due to increase in asset base. Please also include NP  
6 in the table.

7

8

9 A. The change in the Island Industrial Customer Specifically Assigned Charges from the  
10 approved 2015 Test Year to the proposed final 2019 Test Year is approximately \$0.5  
11 million.<sup>1</sup> As indicated in Hydro's response to NP-NLH-096, the change in Specifically  
12 Assigned Charges due to the proposed change in methodology of Allocation of  
13 Operating and Maintenance Costs to Specifically Assigned Assets is a decrease of  
14 approximately \$0.4 million (with an offsetting increase to Newfoundland Power).  
15 The difference of approximately \$0.1 million (approximately \$0.5 million less \$0.4  
16 million) relates to the net impact of the increase in the transmission asset base  
17 offset by the additions of new specifically assigned assets.

---

<sup>1</sup> \$1.6 million in the 2015 Test Year compared to \$1.1 million in the 2019 Test Year.
