

1 Q. Has the Government of Newfoundland and Labrador advised or directed Nalcor
2 Energy or Newfoundland Hydro on any electricity rate mitigation policy or target to
3 be used for domestic electricity rates?
4

4

5

6 A. Nalcor and Hydro have been directed to advance opportunities to maximize
7 revenue through export sales of electricity; to utilize surplus power from Labrador
8 on the island in 2018; and, to import less expensive power via the Maritime Link.
9 Nalcor and Hydro have not been advised or directed by the Government of
10 Newfoundland and Labrador of a final target to be used for domestic electricity
11 rates.
12

12

13 In accordance with direction of the Rate Mitigation Committee, Nalcor/Hydro has
14 generated various rate scenarios to better understand the impact of Muskrat Falls
15 on domestic electricity rates. Please see Nalcor's response to PUB-Nalcor-025.
