

1 Q. Please provide Newfoundland Hydro`s monthly load (GWh) and peak demand (MW)
2 for both the Island Interconnected System (“IIS”) and the Labrador Interconnected
3 System (“LIS”) broken down by rate class for the period 2008 to 2018 and forecast
4 for 2019 to 2030, inclusive. For each of the two systems (IIS and LIS) provide a
5 breakdown between Hydro sales and Hydro system losses for GWh load and MW
6 peak demand by month.

7

8

9 A. Please refer to PUB-Nalcor-057, Attachment 1 that provides the historical and
10 forecast monthly load and peak demands as requested (This document is filed
11 electronically in excel and not printed due to the size).
