Subject: TRIM: rate mitigation

I implore you to keep electricity rates below 15 cents. The Government must find other ways to pay for the obscene boondoggle. One very good place to start is cutting the duplication and overpaid jobs at the head of Nalcor. Another good place would be to downsize the Public Service to where it was before Williams went on a splurge in hiring. Government has to keep spending to within it's means. Raising taxes would only make matters worse. Cuts are imperative.
