

1 Q. **Tab 25; Volume II: Install Automated Meter Reading (2018-2019)**

2 Has Hydro performed an analysis of the actual cost benefits achieved by previous
3 AMR projects? If so, please provide the analysis. If not, please explain the rationale
4 for not doing an analysis.

5

6

7 A. Hydro has not completed a cost benefit analysis of our AMR projects to date. Our pilot
8 project in St. Brendan's was completed in 2003 and Hydro committed to a fifteen year AMR
9 plan in our 2007 CBA.

10

11 Positive net present values of the project were not projected until year ten which
12 leads us to present day. A cost benefit analysis of the project is scheduled for early
13 2018, allowing for review of the full 10 year review period.
