

1    Q.    **Cost of Service**

2            What is the Holyrood fuel conversion factor used in the cost of service study and  
3            what is the basis for using this fuel conversion factor? Please provide a comparison  
4            of the amounts allocated to each customer class on the Island Interconnected  
5            System in dollars and average cents/kWh using the proposed Holyrood fuel  
6            conversion factor and the forecast Holyrood fuel conversion factor averaged over  
7            the period 2015 through 2017.

8  
9  
10    A.    The Holyrood fuel conversion factor used in the 2015 Cost of Service Study is 607  
11           kWh/bbl. Please refer to Section 2, Pages 2.74 to 2.76 of the Evidence to Hydro's  
12           Amended Application for the basis for this forecast. The forecast Holyrood fuel  
13           conversion factor averaged over the period 2015 through 2017 is 604 kWh/bbl.

14  
15           Please see CA-NLH-302 Attachment 1 for a comparison of the 2015 No. 6 fuel cost  
16           allocated to each Island Interconnected System customer class using: (i) the  
17           proposed Holyrood fuel conversion factor and (ii) the forecast Holyrood fuel  
18           conversion factor averaged over the period 2015 through 2017.

Comparison of Customer Impact on Cost of Service using requested Holyrood Efficiency Factor

Line No		A	B	C
		Basis of Allocation (MWh @ Gen)	As Filed @ 607 kWh/bbl \$	As requested @ 604 kWh/bbl \$
