

1 Q. Per IC-NLH-028 and Regulated Activities Schedule II, please indicate why Hydro uses
2 the December peaks for CP calculation purposes. Please indicate whether Hydro
3 considered February peaks to be a better representation of the peak load profile of
4 NP as the largest customer.

5

6

7 A. Please see Hydro's response to IC-NLH-154 which explains why Hydro used the
8 December peaks for 2013 Test Year COS including coincident peak calculation
9 purposes.

10

11 Based on Hydro's historical record of NP native peaks from 1983 to 2012, the NP
12 annual native peak load has occurred most often in January. This is followed by the
13 months of February, December and March.
