

1 Q. **Re: IN-NLH-032**

2 Charts 1-4 apparently do not break down the assets by system, as requested. On  
3 page 1, it is mentioned that “Hydro do not track information on capital  
4 expenditures by system during the course of a capital project.”

5 Please present charts similar to Charts 1-4, including only those projects that  
6 concern the Labrador Interconnected System.

7 If Hydro is unable to comply with this request, please provide a list of all the capital  
8 projects summarized in Charts 1-4, indicating the location of each.

9

10

11 A. Please see revised Charts 1 to 4 below which show capital expenditures and  
12 forecasts for 2007 to 2018 at the time of evidence preparation by generation,  
13 transmission, distribution and other with growth and sustaining expenditures  
14 segregated pertaining to the Labrador Interconnected System. Please note that  
15 these charts exclude capital projects such as vehicle replacements, power  
16 transformer upgrades, and computer replacements that could have components  
17 pertaining to the Labrador Interconnected System. [ ] Projects that are applicable to  
18 multiple systems are excluded from the presentation.
