

1 Q. **Investments**

2 **Re: IN-NLH-030, Rev. 1 and IN-NLH-032, Rev. 1**

3 Please provide an estimate of the rate impact for the Labrador Interconnected
4 System of the investments of approximately \$350 million expected to be put into
5 service in 2016.

6

7

8 A. Subsequent to the preparation of Hydro's Amended Application, the construction of
9 a third transmission line between Churchill Falls and Labrador West was temporarily
10 suspended pending the completion of Alderon Iron Ore Corp's financing plan.

11 While the timing of any capital associated with this construction project remains
12 uncertain, it will not have any impact on 2016 rates for the Labrador Interconnected
13 System.
