Note 1: The original RSP was approved November 8, 1985. The rules and regulations of the RSP have been updated throughout the life of the RSP. The most recent amendment to the rules and regulations of the RSP was in Board Order No. P.U. 4(2012). Hydro has also applied for amendments to the RSP in Section 4: Rates and Regulation 4.6.1.

Note 2: The current methodology approved in Board Order No. P.U. 40(2003); however, it is noted that only 25% of the hydraulic provision is assigned annually to each customer class for recovery or repayment.

Note 3: Hydro's energy conservation program costs were approved to be deferred in Board Order No. P.U. 14(2009), P.U.13(2010), P.U. 4(2011) and P.U.3(2012). In P.U. 21(2013) the Board ordered that 2013 costs should be considered as part of the 2013 test year requirements. In Section 4: Rates and Regulation, 4.7.3(i) of the 2013 GRA Application, Hydro re-applied for the deferral of 2013 program costs.
