**VALE NEWFOUNDLAND & LABRADOR LIMITED**

**V-NP-001 and V-PUB-001 to V-PUB-002**

**Issued May 7, 2014**

**V-NP-001** Reference: Section 4.3: NP Curtailable Load Recommendation, Pages 8 – 10

Mr. Brockman proposes to recognize the NP curtailable load in the cost of service (COS) study in the same manner as the NP thermal generation. If Hydro and an industrial customer were to agree on interrupting a load of 60 mW, would Mr. Brockman also recommend recognizing the 60 mW in the same way in the COS study?

**V-PUB-001** Reference: Section II: Cost Allocation, Transmission Plant and Costs, Pages 10 – 12

Mr. Wilson proposes changing the existing classification of network lines and substations. Has Mr. Wilson calculated the impact that his proposed changes would have on each customer class? If so, please supply the impact, complete with all calculations.

**V-PUB-002** Reference: Section IV: Other Issues Related to Cost Allocation and Rate Design, Conservation and Demand Management (CDM), Pages 31 – 34

Mr. Wilson proposes exempting NP from paying a portion of the CDM program because NP has their own CDM costs. At the time of construction, new industrial customers incorporate energy saving designs at their own cost, even though all customers benefit from the reduced fuel consumption at Holyrood resulting from these designs. In view of this, does Mr. Wilson likewise support industrial customers being exempt from paying their portion of the CDM costs?
