

1 **Q. On the same Page “All expenditures are required on the basis of maintaining**
2 **access to hydroelectric generation that is lower than the cost of replacement**
3 **energy.” Please identify what replacement energy you are referring to in this**
4 **statement.**

5
6 A. Newfoundland Power refers to replacement energy as the energy that would be required
7 to offset a reduction in Newfoundland Power’s hydroelectric generation on the Island
8 Interconnected System. Please see 2. *Assessment of Least Cost Supply* to the response to
9 Request for Information NLH-NP-007 for further information regarding the cost of other
10 energy sources on the Island Interconnected System.
