**Issued: November 28, 2013**

---

LWHN – NLH – 76 – Re: Re: Responses to NP-NLH-073 and LWHN-NLH-046. It appears that approximately 1 million MW hours was spilled in 2011. Please provide an explanation.

LWHN – NLH – 77 If the spill in 2011 could have been contained, by how much energy production would reliance on Holyrood been reduced?

LWHN – NLH – 78 For the years 2007 to 2013 please provide estimates of annual spill from the Deer Lake hydro facility.

LWHN – NLH – 79 Does NL Hydro coordinate spill and the release of water with Deer Lake as well as the other producers of hydro power?

LWHN – NLH – 80 Please indicate the energy produced at the Cat Arm facility in May of 2012 and in May of 2013. Did NL Hydro spill or release water at Cat Arm in 2013? If so, please explain why.

LWHN – NLH – 81 At times, does NL Hydro release water from its reservoirs or ask other hydro-electricity producers to release water? If so, please explain why, and give indications of the annual magnitudes involved since 2007.

DATED at Labrador City, Newfoundland and Labrador this 28<sup>th</sup> day of  
November, 2013.
