

Newfoundland Labrador Hydro (NLH)  
Supply and Demand Status Report Filed Monday, February 05, 2018

Section 1  
Island Interconnected System Supply, Demand & Exports  
Actual 24 Hour System Performance For Sunday, February 04, 2018

Supply Notes For February 04, 2018

1,2

- A As of 2115 hours, January 04, 2018, Stephenville Gas Turbine available at 25 MW (50 MW).  
B As of 0749 hours, February 03, 2018, Holyrood Unit 2 available at 129 MW (170 MW).  
C As of 0749 hours, February 03, 2018, Holyrood Unit 3 available at 107 MW (150 MW).  
D As of 1204 hours, February 03, 2018, Holyrood Unit 1 unavailable 70 MW (170 MW).

Section 2  
Island Interconnected Supply and Demand

Mon, Feb 05, 2018	Island System Outlook <sup>3</sup>			Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
					Morning	Evening		
Available Island System Supply: <sup>5</sup>	1,760	MW		Monday, February 05, 2018	-3	5	1,475	1,332
NLH Generation: <sup>4</sup>	1,415	MW		Tuesday, February 06, 2018	-1	-4	1,460	1,352
NLH Power Purchases: <sup>6</sup>	140	MW		Wednesday, February 07, 2018	-5	-3	1,465	1,322
Maritime Link Imports:	-	MW		Thursday, February 08, 2018	-3	5	1,495	1,377
Other Island Generation:	205	MW		Friday, February 09, 2018	-6	-8	1,575	1,466
Current St. John's Temperature & Windchill:	-2 °C	-11 °C		Saturday, February 10, 2018	-8	-4	1,490	1,382
7-Day Island Peak Demand Forecast:	1,575	MW		Sunday, February 11, 2018	-5	0	1,405	1,288

Supply Notes For February 05, 2018

3

- Notes:
1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
  2. Due to the Island System having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units some customer's load must be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding, is necessary to ensure the integrity and reliability of system equipment. Under frequency events typically occur 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes.
  3. As of 0800 Hours.
  4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
  5. Gross output from all Island sources (including Note 4).
  6. NLH Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation, Vale capacity assistance (when applicable).
  7. Adjusted for CBP&P, Vale and Praxair interruptible load, Maritime Link Exports and the impact of voltage reduction (when applicable).

Section 3  
Island Peak Demand Information  
Previous Day Actual Peak and Current Day Forecast Peak

Sun, Feb 04, 2018	Actual Island Peak Demand <sup>8</sup>	09:20	1,526 MW
Mon, Feb 05, 2018	Forecast Island Peak Demand		1,475 MW

- Notes: 8. Island Demand / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
