

Newfoundland Labrador Hydro (NLH)  
Supply and Demand Status Report Filed Friday, April 06, 2018

Section 2 Island Interconnected Supply and Demand								
Fri, Apr 06, 2018  Island System Outlook <sup>3</sup>				Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
					Morning	Evening	Forecast	Adjusted <sup>7</sup>
Available Island System Supply: <sup>5</sup>	1,760	MW		Friday, April 06, 2018	-2	-4	1,335	1,255
NLH Generation: <sup>4</sup>	1,380	MW		Saturday, April 07, 2018	-2	6	1,310	1,230
NLH Power Purchases: <sup>6</sup>	145	MW		Sunday, April 08, 2018	3	1	1,190	1,110
Maritime Link Imports:	30	MW		Monday, April 09, 2018	11	-1	1,285	1,205
Other Island Generation:	205	MW		Tuesday, April 10, 2018	-1	-1	1,305	1,225
Current St. John's Temperature & Windchill:	-2 °C	-10	°C	Wednesday, April 11, 2018	1	1	1,270	1,190
7-Day Island Peak Demand Forecast:	1,335	MW		Thursday, April 12, 2018	2	4	1,200	1,120
Supply Notes For April 06, 2018 <sup>3</sup>								
Notes:								
<div>1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.</div> <div>2. Due to the Island System having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units some customer's load must be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding, is necessary to ensure the integrity and reliability of system equipment. Under frequency events typically occur 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes.</div> <div>3. As of 0800 Hours.</div> <div>4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).</div> <div>5. Gross output from all Island sources (including Note 4).</div> <div>6. NLH Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation, Vale capacity assistance (when applicable).</div> <div>7. Adjusted for CBP&amp;P and Maritime Link Exports.</div>								

Section 3 Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak			
Thu, Apr 05, 2018	Actual Island Peak Demand <sup>8</sup>	07:15	1,197 MW
Fri, Apr 06, 2018	Forecast Island Peak Demand		1,335 MW
Notes: 8. Island Demand / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
