## Newfoundland Labrador Hydro (NLH) Supply and Demand Status Report Filed Monday, April 16, 2018

## Supply Notes For April 13, 2018

1,2

- A As of 2115 hours, January 04, 2018, Stephenville Gas Turbine available at 25 MW (50 MW).
- B As of 0801 hours, April 02, 2018, Holyrood Unit 3 unavailable due to planned outage 110 MW (150 MW).
- As of 1300 hours, April 05, 2018, Hawkes Bay Diesel Plant unavailable (5 MW).
- As of 1754 hours, April 05, 2018, Holyrood Unit 2 available at 80 MW (170 MW).
- E As of 0836 hours, April 12, 2018, Holyrood Unit 1 available at 126 MW (170 MW).
- At 0836 hours, April 13, 2018, Hardwoods Gas Turbine unavailable due to planned outage (50 MW).
- At 1057 hours, April 13, 2018, Hardwoods Gas Turbine available (50 MW).

## Section 2 **Island Interconnected Supply and Demand Temperature Island System Daily** Island System Outlook<sup>3</sup> Sat, Apr 14, 2018 (°C) Seven-Day Forecast Peak Demand (MW) Adjusted<sup>7</sup> Morning **Evening** Forecast 1,295 1,215 Available Island System Supply:5 Saturday, April 14, 2018 2 -4 1,720 MW NLH Generation: 1,285 1,365 1,380 MWSunday, April 15, 2018 -5 -1 NLH Power Purchases:<sup>6</sup> 1,390 1,310 Monday, April 16, 2018 -4 130 MW -4 1,250 Maritime Link Imports: Tuesday, April 17, 2018 1,330 MW-4 -1 2 Other Island Generation: Wednesday, April 18, 2018 1,205 1,125 210 MWCurrent St. John's Temperature & Windchill: $^{\circ}$ C N/A Thursday, April 19, 2018 2 1,195 1,115 Friday, April 20, 2018 7-Day Island Peak Demand Forecast:

## Supply Notes For April 14, 2018

Notes:

- 1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
- 2. Due to the Island System having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units some customer's load must be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding, is necessary to ensure the integrity and reliability of system equipment. Under frequency events typically occur 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes.
- 3. As of 0800 Hours.
- 4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
- 5. Gross output from all Island sources (including Note 4).
- 6. NLH Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation, Vale capacity assistance (when applicable).
- Adjusted for CBP&P and Maritime Link Exports.

	Section 3		
Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak			
Sat, Apr 14, 2018	Forecast Island Peak Demand		1,295 MW

Notes: 8. Island Demand / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
