

Newfoundland Labrador Hydro (NLH)  
Supply and Demand Status Report Filed Friday, June 08, 2018

Section 1  
Island Interconnected System Supply, Demand & Exports  
Actual 24 Hour System Performance For Thursday, June 07, 2018

Supply Notes For June 07, 2018

- A As of 0801 hours, April 02, 2018, Holyrood Unit 3 unavailable due to planned outage 110 MW (150 MW).
- B As of 1800 hours, April 29, 2018, Bay d'Espoir Unit 5 unavailable due to planned outage (76.5 MW).
- C As of 0623 hours, May 08, 2018, Bay d'Espoir Unit 6 unavailable due to planned outage (76.5 MW).
- D As of 0801 hours, May 15, 2018, St. Anthony Diesel Plant available at 7.7 MW (9.7 MW).
- E As of 1438 hours, May 22, 2018, Holyrood Unit 2 unavailable due to planned outage 70 MW (170 MW).
- F As of 1357 hours, June 01, 2018, Stephenville Gas Turbine available at 25 MW (50 MW).
- G As of 1430 hours, June 02, 2018, Hardwoods Gas Turbine available at 25 MW (50 MW).
- H As of 2143 hours, June 04, 2018, Holyrood Unit 1 available at 100 MW (170 MW).

Section 2  
Island Interconnected Supply and Demand

| Fri, Jun 08, 2018                                | Island System Outlook <sup>3</sup> |    |  | Seven-Day Forecast       | Temperature (°C) |         | Island System Daily Peak Demand (MW) |                       |
|--|------------------------------------|----|--|--------------------------|------------------|---------|--------------------------------------|-----------------------|
|  |                                    |    |  |                          | Morning          | Evening | Forecast                             | Adjusted <sup>7</sup> |
| Available Island System Supply: <sup>5</sup>     | 1,420                              | MW |  | Friday, June 08, 2018    | 7                | 8       | 935                                  | 935                   |
| NLH Generation: <sup>4</sup>                     | 1,100                              | MW |  | Saturday, June 09, 2018  | 6                | 7       | 910                                  | 910                   |
| NLH Power Purchases: <sup>6</sup>                | 120                                | MW |  | Sunday, June 10, 2018    | 8                | 8       | 880                                  | 880                   |
| ML/LIL Imports:                                  | -                                  | MW |  | Monday, June 11, 2018    | 6                | 5       | 910                                  | 910                   |
| Other Island Generation:                         | 200                                | MW |  | Tuesday, June 12, 2018   | 7                | 6       | 890                                  | 890                   |
| Current St. John's Temperature & Windchill: 7 °C | N/A                                | °C |  | Wednesday, June 13, 2018 | 5                | 9       | 935                                  | 935                   |
| 7-Day Island Peak Demand Forecast:               | 935                                | MW |  | Thursday, June 14, 2018  | 15               | 14      | 800                                  | 800                   |

Supply Notes For June 08, 2018

- Notes:
- Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
  - Due to the Island System having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units some customer's load must be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding, is necessary to ensure the integrity and reliability of system equipment. Under frequency events typically occur 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes.
  - As of 0800 Hours.
  - Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
  - Gross output from all Island sources (including Note 4).
  - NLH Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation, Vale capacity assistance (when applicable).
  - Adjusted for CBPP, Vale and Praxair interruptible load, Maritime Link and Labrador-Island Link exports and the impact of voltage reduction, when applicable.

Section 3  
Island Peak Demand Information  
Previous Day Actual Peak and Current Day Forecast Peak

|                   |  |       |          |
|-------------------|--|-------|----------|
| Thu, Jun 07, 2018 | Actual Island Peak Demand <sup>8</sup> | 08:05 | 1,010 MW |
| Fri, Jun 08, 2018 | Forecast Island Peak Demand            |       | 935 MW   |

Notes: 8. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
