

## Newfoundland Labrador Hydro (NLH)

NLH Island Power Purchases: <sup>6</sup>	110	MW	Friday, July 20, 2018	18	16	795	795
Other Island Generation:	200	MW	Saturday, July 21, 2018	21	16	750	750
ML/LIL Imports:	-	MW	Sunday, July 22, 2018	19	19	750	750
Current St. John's Temperature & Windchill: 18 °C	N/A	°C	Monday, July 23, 2018	20	20	795	795
7-Day Island Peak Demand Forecast:	800	MW	Tuesday, July 24, 2018	19	12	795	795
Supply Notes For July 18, 2018 <sup>3</sup>							
L At 0653 hours, July 18, 2018, Holyrood Combustion Turbin	<mark>ie unavailable d</mark>	<mark>ue to plan</mark>	ned outage (123.5 MW).				
Notice 1 Concration outgoes for running and corrective maintenance	are included. The	oco aro not	unusual for nower system operations. They general	ly do not impo	et customor cu	upply. The powe	r system

1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system Notes: operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.

2. Due to the Island System having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units some customer's load must be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding, is necessary to ensure the integrity and reliability of system equipment. Under frequency events typically occur 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes.

## 3. As of 0800 Hours.

4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).

5. Gross output from all Island sources (including Note 4).

6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation, Vale capacity assistance (when applicable).

7. Adjusted for CBPP, Vale and Praxair interruptible load, Maritime Link and Labrador-Island Link exports and the impact of voltage reduction, when applicable.

Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak						
Tue, Jul 17, 2018	Actual Island Peak Demand <sup>8</sup>	12:00	739 MW			
Ved, Jul 18, 2018	Forecast Island Peak Demand		775 MW
