

**Newfoundland Labrador Hydro (NLH)
Supply and Demand Status Report Filed Monday, December 03, 2018**

**Section 1
Island Interconnected System Supply, Demand & Exports
Actual 24 Hour System Performance For Saturday, December 01, 2018**

Supply Notes For December 01, 2018

1,2

- A As of 1635 hours, November 28, 2018, Holyrood Unit 1 available at 160 MW (170 MW).
- B As of 0756 hours, November 30, 2018, Hardwoods Gas Turbine unavailable due to planned outage 25 MW (50 MW).
- C As of 2001 hours, November 30, 2018, Holyrood Unit 2 unavailable due to planned outage (170 MW).

**Section 2
Island Interconnected Supply and Demand**

Sun, Dec 02, 2018	Island System Outlook ³	Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
			Morning	Evening	Forecast	Adjusted ⁷
Available Island System Supply: ⁵	1,775 MW	Sunday, December 02, 2018	2	0	1,275	1,174
NLH Island Generation: ⁴	1,465 MW	Monday, December 03, 2018	0	6	1,365	1,263
NLH Island Power Purchases: ⁶	110 MW	Tuesday, December 04, 2018	2	2	1,325	1,224
Other Island Generation:	200 MW	Wednesday, December 05, 2018	-2	-3	1,390	1,288
ML/LIL Imports:	- MW	Thursday, December 06, 2018	-4	-3	1,430	1,327
Current St. John's Temperature & Windchill:	0 °C	Friday, December 07, 2018	-4	-3	1,385	1,283
7-Day Island Peak Demand Forecast:	1,430 MW	Saturday, December 08, 2018	-3	-2	1,400	1,298

Supply Notes For December 02, 2018

3

- Notes:
1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
 2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
 3. As of 0800 Hours.
 4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
 5. Gross output from all Island sources (including Note 4).
 6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
 7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.

**Section 3
Island Peak Demand Information
Previous Day Actual Peak and Current Day Forecast Peak**

Sat, Dec 01, 2018	Actual Island Peak Demand ⁸	17:05	1,270 MW
Sun, Dec 02, 2018	Forecast Island Peak Demand		1,275 MW

- Notes: 8. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
