

Newfoundland Labrador Hydro (NLH)
Supply and Demand Status Report Filed Friday, December 28, 2018

Section 1
Island Interconnected System Supply, Demand & Exports
Actual 24 Hour System Performance For Saturday, December 22, 2018

Supply Notes For December 22, 2018

A As of 1615 hours, December 19, 2018, Holyrood Unit 1 available at 162 MW (170 MW).

Section 2
Island Interconnected Supply and Demand

Sun, Dec 23, 2018	Island System Outlook ³			Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
	Morning	Evening	Forecast		Morning	Evening	Forecast	Adjusted ⁷
Available Island System Supply: ⁵	2,135	MW		Sunday, December 23, 2018	5	1	1,300	1,199
NLH Island Generation: ⁴	1,685	MW		Monday, December 24, 2018	-5	-4	1,495	1,392
NLH Island Power Purchases: ⁶	135	MW		Tuesday, December 25, 2018	-3	-5	1,495	1,392
Other Island Generation:	205	MW		Wednesday, December 26, 2018	-6	-6	1,515	1,411
ML/LIL Imports:	110	MW		Thursday, December 27, 2018	-7	-8	1,570	1,466
Current St. John's Temperature & Windchill:	6	N/A °C		Friday, December 28, 2018	-10	-6	1,610	1,505
7-Day Island Peak Demand Forecast:	1,610	MW		Saturday, December 29, 2018	-1	3	1,315	1,214

Supply Notes For December 23, 2018

³

- Notes:
- Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
 - Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
 - As of 0800 Hours.
 - Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
 - Gross output from all Island sources (including Note 4).
 - NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
 - Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.

Section 3
Island Peak Demand Information
Previous Day Actual Peak and Current Day Forecast Peak

Sat, Dec 22, 2018	Actual Island Peak Demand ⁸	17:00	1,326 MW
Sun, Dec 23, 2018	Forecast Island Peak Demand		1,300 MW

Notes: 8. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
