## Newfoundland Labrador Hydro (NLH) Supply and Demand Status Report Filed Friday, March 01, 2019

## Section 1 Island Interconnected System Supply, Demand & Exports Actual 24 Hour System Performance For Thursday, February 28, 2019

Supply Notes For February 28, 2019

1,2

As of 0409 hours, February 27, 2019, Bay d'Espoir Unit 5 unavailable (76.5 MW).

As of 1003 hours, February 27, 2019, Hardwoods Gas Turbine available at 25 MW (50 MW).

## Section 2

**Island Interconnected Supply and Demand** 

Fri, Mar 01, 2019	Island System Outlook <sup>3</sup>		Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
				Morning	Evening	Forecast	<b>Adjusted</b> <sup>7</sup>
Available Island System Supply: <sup>5</sup>	2,015	MW	Friday, March 01, 2019	-10	-8	1,620	1,515
NLH Island Generation: <sup>4</sup>	1,590	MW	Saturday, March 02, 2019	-8	-7	1,490	1,387
NLH Island Power Purchases: <sup>6</sup>	145	MW	Sunday, March 03, 2019	-9	-5	1,460	1,357
Other Island Generation:	180	MW	Monday, March 04, 2019	-4	-2	1,410	1,308
ML/LIL Imports:	100	MW	Tuesday, March 05, 2019	3	-4	1,390	1,288
Current St. John's Temperature & Windchill:	-8 °C -18	°C	Wednesday, March 06, 2019	-9	-8	1,545	1,441
7-Day Island Peak Demand Forecast:	1,620	MW	Thursday, March 07, 2019	-6	-10	1,235	1,135

Supply Notes For March 01, 2019

Notes:

- 1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
- 2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
- 3. As of 0800 Hours.
- 4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
- 5. Gross output from all Island sources (including Note 4).
- 6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
- 7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.

## Section 3 Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak Thu, Feb 28, 2019 Actual Island Peak Demand 8 Forecast Island Peak Demand 9 Forecast Island Peak Demand 1,620 MW

Notes: 8. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
