

Newfoundland Labrador Hydro (NLH) Supply and Demand Status Report Filed Wednesday, January 18, 2023

Section 1 Island Interconnected System Supply, Demand & Exports Actual 24 Hour System Performance For Tuesday, January 17, 2023

Supply Notes For January 17, 2023

1,2

- A As of 1200 hours, January 15, 2023, Holyrood Unit 2 available but not operating (170 MW).
 B At 0704 hours, January 17, 2023, Upper Salmon Unit unavailable due to planned outage (84 MW).
 C At 1103 hours, January 17, 2023, Bay d'Espoir Unit 1 unavailable due to planned outage (76.5 MW).
 D At 1525 hours, January 17, 2023, Bay d'Espoir Unit 1 available (76.5 MW).

Section 2 Island Interconnected Supply and Demand

Wed, Jan 18, 2023	Island System Outlook ³		Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)	
				Morning	Evening	Forecast	Adjusted ⁷
Available Island System Supply: ⁵	1,894	MW	Wednesday, January 18, 2023	6	2	1,255	1,160
NLH Island Generation: ^{4,8}	1,370	MW	Thursday, January 19, 2023	1	1	1,290	1,195
NLH Island Power Purchases: ⁶	140	MW	Friday, January 20, 2023	-1	-1	1,405	1,309
Other Island Generation:	230	MW	Saturday, January 21, 2023	-1	-2	1,425	1,329
ML/LIL Imports:	154	MW	Sunday, January 22, 2023	-2	-4	1,390	1,294
Current St. John's Temperature & Windchill:	6 °C	N/A °C	Monday, January 23, 2023	-3	-1	1,395	1,299
7-Day Island Peak Demand Forecast:	1,425	MW	Tuesday, January 24, 2023	4	-3	1,420	1,324

Supply Notes For January 18, 2023

3

- E At 0432 hours, January 18, 2023, Cat Arm Unit 2 unavailable (67 MW).

- Notes:
1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
 2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
 3. As of 0800 Hours.
 4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
 5. Gross output from all Island sources (including Note 4).
 6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
 7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.
 8. Due to limitations inherent in the design of combustion turbines, the output of combustion turbines may be reduced in the event that ambient temperatures exceed the threshold

Section 3 Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak

Tue, Jan 17, 2023	Actual Island Peak Demand ⁹	17:45	1,233 MW
Wed, Jan 18, 2023	Forecast Island Peak Demand		1,255 MW

- Notes: 9. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
