

- 1 **Q: Do Liberty’s analyses indicate that there is duplication of functions**
2 **undertaken by Newfoundland Power and Hydro as it relates to the operation**
3 **of the IIS?**
4
5
6 **A.** Hydro and Newfoundland Power have parallel, but not duplicative, functions as
7 they relate to the operation of the IIS. Hydro controls its generation, Newfoundland
8 Power controls its generation; Hydro controls its transmission and distribution,
9 Newfoundland Power controls its transmission and distribution. The control centres
10 of both utilities share real-time operating information necessary for the safe and
11 reliable operation of each other’s systems.
