

1 Q. Page 1 of the Teshmont Report references “*two 315 kV ac transmission lines*
2 *between Churchill Falls and Muskrat Falls*”. Please provide the main purpose of
3 these transmission lines and cost impact to the Hydro customers on the IIS.
4
5

6 A. The question refers to the Labrador Transmission Assets (LTA) being constructed
7 between the Muskrat Falls hydroelectric plant on the Churchill River and the
8 hydroelectric generating plant located at Churchill Falls. The LTA facilities are being
9 put in place to facilitate the efficient use of the hydro generation facilities along the
10 Churchill River, including the Churchill Falls and Muskrat Falls stations.
11

12 The cost impact of the LTA facilities is not included in the scope of the present
13 proceeding.
