

1 Q. Emera Newfoundland and Labrador in its website notes “The Maritime Link Project
2 is a 35-year investment equal to 20 percent of the total cost of Phase I of the Lower
3 Churchill Project and the Maritime Link, in exchange for 20 percent of the electricity
4 from Muskrat Falls”

5 [source: <http://www.emeranl.com/en/home/themaritimelink/overview.aspx>,
6 accessed on June 9, 2016]. Please confirm that 20 percent of the electricity from
7 Muskrat Falls is expected to be supplied to Nova Scotia and will not be available to
8 supply Hydro load on the IIS.

10

11 A. It is correct that a fixed annual amount of energy equivalent to 20 percent of the
12 average annual energy capability from Muskrat Falls is expected to be supplied to
13 Nova Scotia each year of the 35-year agreement and will not be available to supply
14 Hydro load on the IIS.
