

1 Q. Page 1 of the Teshmont Report notes that up to 300 MW can be exported from
2 Nova Scotia to Newfoundland and Labrador using proposed Maritime Link
3 transmission line under a LIL contingency. Please provide details if Hydro, or if
4 Hydro is aware any other party, has entered into any agreement with Emera or
5 other providers regarding such power purchases using the proposed Maritime Link
6 transmission line.

7
8
9 A. Hydro has not entered into any agreement, nor is aware of any agreement, with
10 Emera or other providers regarding such power purchases using the proposed
11 Maritime Link transmission line. Hydro continues to investigate the technical
12 requirements for import over this transmission line, as discussed in PUB-NLH-620.
