

1 Q. Does Hydro anticipate having to add any other generation on the Avalon Peninsula
2 between the present and 2023? If so, please provide details of anticipated
3 additions.

4

5

6 A. Hydro does not anticipate having to add generation on the Avalon Peninsula
7 between the present and 2023 but is currently investigating the opportunity of
8 purchasing the leased black start diesels at Holyrood to enhance both Island and
9 Avalon Peninsula reserves during the period leading to the completion of the
10 Labrador-Island Transmission Link and the new 230 KV transmission circuit between
11 Bay d'Espoir and Western Avalon.
