

1 Q. Reference PUB-NLH-513: Please provide the most up to date predicted overall  
2 outage rate and availability for the LIL, including bipolar and monopolar outages,  
3 providing information both for scheduled and forced outages and update the  
4 information in GRK-NLH-060 or confirm that information.

5

6

7 A. To date, Hydro has not received a probabilistic reliability study of the converters,  
8 considering all major components and systems, from the manufacturer.  
9 Consequently, Hydro is not in a position to update the outage rates and availability  
10 of the LIL.
