Subject: Re: [External] NLH - Reliability and Resource Adequacy Study Review - To Parties - Further Process

Good Morning,

On May 5, Hydro received correspondence from the Board of Commissioners of Public Utilities directing Hydro to, among other things, file the following by May 19, 2023:

"... a comprehensive list of all reports, studies and analyses it has currently underway or planned with respect to the reliability of the LIL, potential alternative generation resources, the load forecast, and any other issues raised in the 2022 RRAS Update and the May 1-2, 2023 technical conference. This list shall include a description of the scope of each study, report and analysis, the consultant or group undertaking the work and the schedule for completion."

At this time, Hydro requests an extension of the date for filing this list, to May 25, 2023, to ensure that the information contained in that list is complete and sufficiently detailed.

Thank you,
Shirley

Shirley Walsh BComm, LLB, CIC.C (she/her)
