

1 Q. **Reference: Application, Appendix E, page E-5, footnote 4**

2 “Upon the creation of the Newfoundland and Labrador System Operation (NLSO)
3 the Wabush substation was re-assigned from a distribution substation to part of the
4 NL transmission system”

5

6 (A) How much was added to the transmission rate base as a result of this
7 assignment? Please segregate the amount for the Lab West and Lab East
8 transmission systems.

9

10 (B) What is the additional 2019 transmission revenue requirement resulting from
11 this re-assignment?

12

13 (C) How is the station functionalized in the Cost of Service study? Please include the
14 references to the latest cost study filed with the P.U.B.

15

16

17 A. (A) The reference in the question pertains only to the operational control of the
18 Wabush Substation being assigned to the NLSO. Currently, there has been no
19 change in Hydro’s rate base due to this action.

20

21 (B) Please refer to part (A).

22

23 (C) Further to Hydro’s response to part (A), there have been no changes in the
24 functionalization of the Wabush Substation.
