5
6
7
8

It remains probable that Hydro will incur costs in 2021 as a result of the commissioning of the Muskrat Falls Project. Therefore, although Hydro proposes to delay its GRA filing, Hydro is proposing to continue to require 2021 as a test year for use in determining the 2021 costs to be ultimately recovered from customers.

9 In light of the uncertainty surrounding the timing of the commissioning of the Muskrat Falls
10 Project what is the probability that there will be material costs as a result of the commissioning
11 of the Muskrat Falls Project in 2021?

12
13

14 A. Newfoundland and Labrador Hydro (“Hydro”) believes it is very likely there will be material costs
15 in 2021 as a result of the commissioning of the Muskrat Falls Project. Please refer to Hydro’s
16 response to PUB-NLH-003 of this proceeding.
