Subject: Application for Approval for Phase II Additional Early Execution Capital Work for the Avalon Combustion Turbine

Good Morning,

The schedule set by the Board for the above noted Phase II Additional Early Execution Application for Capital Work for the Avalon Combustion Turbine had a deadline of Tuesday, July 21, 2026 for submission of comments by the parties. Newfoundland Power and the Consumer Advocate both responded confirming that they had no objection to the approval of the within application. There were no comments received from any of the other parties. There were no Requests for Information issued for this application.

Newfoundland Power and the Consumer Advocate have also filed comments in the related 2025 Build Application, along with the Island Industrial Customer Group, recommending the overall approval of the Avalon Combustion Turbine project.

Accordingly, given the necessity of this application's approval to enable the continuation of the work begun through the previously approved early execution applications pending completion of the overall review of the project, Hydro respectfully requests that the Board approve the Phase II Additional Early Execution Application as submitted.

Thank you,
Shirley
