

1 Q. **Reference: Application**

2 In order to understand the changes in allocated revenue requirement by class that flow from
3 Cost-of-Service methodology changes separately from system/cost changes since the 2017
4 approved GRA, provide a table of the allocated revenue requirement by customer class flowing
5 from the approved 2017 GRA and the proposed 2027 Test Year separately identifying the impact
6 due to: i) changes in system configuration (for example Muskrat Falls, Labrador-Island Link etc.);
7 ii) changes arising from Cost-of-Service methodologies; and iii) changes in forecast loads,
8 coincident peaks and customer numbers.

11 A. Please refer to Newfoundland and Labrador Hydro's response to CA-NLH-109 of this proceeding
12 for discussion on the issues in quantifying the impact of methodological changes and Hydro's
13 response to CA-NLH-110 of this proceeding for changes in allocators.
