

1 Q. **Reference: Application, Chapter 6, page 6.2**

2 Hydro states “The functionalization of Hydro’s existing generation and transmission assets have
3 remained the same.” How has Hydro functionalized and classified existing generation and
4 transmission assets in the cost of service study?

5

6

7 A. Newfoundland and Labrador Hydro (“Hydro”) functionalized and classified its existing
8 generation and transmission assets based on the function performed by each asset and, where
9 applicable, the operating characteristics of the associated generating facility. Please refer to
10 Schedule F 4.1 of Hydro’s 2026 General Rate Application.
