

1 Q. **Reference: Application**

2 Provide a table that compares the amount of the proposed 2027 Rural Deficit recovered from
3 each customer class through proposed rates to the Rural Deficit allocated in the Cost-of-Service
4 Study. As part of the response, include a column with a brief description of the drivers of
5 material differences.

6

7

8 A. Schedule F 1.2 of Newfoundland and Labrador Hydro's 2026 General Rate Application shows the
9 proposed 2027 Rural Deficit recovered from each customer class through proposed rates, which
10 is equal to the Rural Deficit allocated in the Cost of Service Study.
