

1 Q. **Reference: Schedule F, Volume 1, page 248; Schedule G, page 357; Volume 2, Exhibit 4**

2 a) For each year from 2010 to 2027F, provide a table showing the total number of NP
3 customers by customer class, with Domestic customers decomposed by regular and all-
4 electric.

5 b) For the same years, provide annual total sales in MWh to each group of customers in
6 (a).

7 c) For the same years, provide annual total sales in MWh per customer for each group.

8 d) For January 2023 to June 2026, provide monthly electricity sales (kWh) per customer for
9 Domestic regular, Domestic all-electric, each class of General Service, and street-lighting
10 customers. Provide the four tables in Excel or equivalent tabular format, with a
11 customer-class taxonomy matching the classes used in Schedules F and G. If this data
12 properly belongs to Newfoundland Power rather than Hydro, identify which party
13 should respond and on what basis.

14
15
16 A. a) The data requested pertains to Newfoundland Power Inc. ("Newfoundland Power").
17 Newfoundland and Labrador Hydro ("Hydro") notes that data similar to that requested by
18 the Consumer Advocate is available publicly. For example, information on the number of
19 customers served by Newfoundland Power, as well as forecast energy sales, can be found on
20 the record of Newfoundland Power's 2025–2026 General Rate Application.

21 b) Please refer to Hydro's response to part a).

22 c) Please refer to Hydro's response to part a).

23 d) Hydro does not have the data in the format requested. This question would be better
24 directed to Newfoundland Power.
