

1 Q. **Reference: Technical Conference Presentation (October 14, 2025), page 44**

2 Provide the complete dataset underlying the reserve-versus-actual generation comparison
3 presented at page 44 of the October 14, 2025 technical conference presentation — covering all
4 events from 2015 forward (consistent with the window requested in CA-NLH-014), rather than
5 the excerpt presented — showing for each Hydro-requested "maximize" event during system
6 peak: the date, NP's available hydraulic capacity, NP's actual delivered hydraulic output, and the
7 shortfall or surplus. Also provide Hydro's explanation of why the pattern of shortfalls in this
8 dataset is, or is not, material to the reliability of the hydraulic generation credit as a planning
9 input.
