

1 Q. **Reference: Cost of Service Methodology Application (August 22, 2025), page 97; Technical**
2 **Conference Presentation (October 14, 2025), page 86**

3 Regarding Newfoundland Power's hydraulic generating plants that underlie the NP hydraulic
4 generation credit:

- 5 a) what is the value of those plants based on the cost of purchases from Hydro and the NP
6 hydro generation credit included in Hydro's cost of service study;
- 7 b) provide a table listing all such plants, their capacities, and each plant's monthly
8 generation for January 2025 through June 2026; and
- 9 c) do any of NP's hydraulic plants have significant reservoirs, or are they all run-of-the-
10 river, and if any have significant reservoirs, provide quantitative reservoir information. If
11 this data properly belongs to Newfoundland Power rather than Hydro, identify which
12 party should respond and on what basis.

13
14
15 A. a) Newfoundland and Labrador Hydro ("Hydro") does not have the information requested. This
16 question is better directed to Newfoundland Power Inc. ("Newfoundland Power").

17 b) This question is better directed to Newfoundland Power. Hydro notes that information
18 similar to that requested is publicly available. For example, information relating to
19 Newfoundland Power's assets can be found on the records of Newfoundland Power's
20 annual capital budget applications.

21 c) Please refer to Hydro's response to part b).
