

1 Q. **Reference: Application**

2 Explain why the proposed purchased wind classification represents a more appropriate
3 allocation of integrated system costs than the previously approved methodology. As part of the
4 response, discuss how the proposed methodology considers the multiple functions and
5 characteristics of purchased wind resources within the integrated provincial electricity system,
6 rather than solely their marginal capacity contribution.

7

8

9 A. Please refer to Newfoundland and Labrador Hydro's responses to CA-NLH-144 and CA-NLH-150
10 of this proceeding.
