

1 Q. **Reference: Response to CA-NLH-083, part d**

2 Further to the response to CA-NLH-083, part d, (which was cross referenced to the response to
3 PUB-NLH-008), please provide the Rate Base detailed line items contained in the original Table
4 5-7 of the Application for the 2028 Forecast to 2030 Forecast period.

5
6
7 A. Please refer to Newfoundland and Labrador Hydro's ("Hydro") response to CA-NLH-267 of this
8 proceeding. As noted in that response, Hydro's long-term forecast has not yet been fully
9 updated to reflect all assumptions, methodologies, and proposals contained within Hydro's
10 2026 General Rate Application ("GRA"). Hydro has completed specific analyses and calculations
11 to support responses to requests for information requiring forecast information for 2028–2030.
12 These analyses were based on estimates developed for long-term forecasting and planning
13 purposes and, where necessary, supplemented with targeted calculations to address the specific
14 information requested.

15 While these estimates are sufficient to support the forecast rate base information provided in
16 Hydro's responses, they do not contain the granular level of detail required to prepare the line
17 items presented in original Table 5-7 of the 2026 GRA.
