6

7 A. Please refer to Newfoundland and Labrador Hydro's ("Hydro") response to CA-NLH-281 of this
8 proceeding for the checks and balances performed during completion of the 2027 Test Year Cost
9 of Service Study. The Cost of Service Study submitted for Hydro's 2026 General Rate Application
10 reflects the proposals and assumptions contained within the application and is in accordance
11 with the approved Cost of Service Methodology. No sensitivity analysis was performed that
12 influenced the proposals contained within the study.
