

1 Q. **Reference: Vol. I, Schedule F 2.6E (2027 TY Cost of Service Study, Labrador Interconnected,**
2 **Functional Classification of Rate Base), pp. 1–2 (PDF pp. 295–296); Vol. I, Ch. 6, sec. 6.9.1, p.**
3 **6.29, II. 2–8 (PDF p. 203); Vol. I, Ch. 5, sec. 5.3, Table 5-7, p. 5.11 (PDF p. 154).**

4 Preamble:

5 The Application discloses the 2027 Test Year transmission rate base for the Labrador
6 Interconnected System but does not identify the specific transmission additions made since the
7 2019 Test Year, or the change in that rate base over the period, on which the proposed increase
8 depends.

9 Provide an itemized list of all transmission additions to the Labrador Interconnected System rate
10 base between the 2019 and 2027 Test Years, showing for each: project name, description, in-
11 service date, and capital cost.

12
13
14 A. Please refer to IOC-NLH-001, Attachment 1, which contains a listing of all transmission asset
15 additions to the Labrador Interconnected System.

16 The listing includes, for each asset:

- 17 • Asset ID;
- 18 • Project or asset description;
- 19 • Net book value (“NBV”);
- 20 • Depreciation;
- 21 • In-service date; and
- 22 • Original cost/capital cost.

23 The majority of the transmission additions are associated with transmission station
24 infrastructure classified as terminal stations (“TS”). Significant additions also include

- 1 transmission line assets, including Line 1303 (“L1301”)-related structures, conductor additions,
2 and associated Wood Pole Line Management (“WPLM”) inspection and refurbishment
3 investments.
- 4 Examples of material additions included are displayed in Table 1.

Table 1: Material Additions Examples (\$ Millions)

Asset/Project	Average NBV
Conductor – Darien 559.5 kmil	0.3
L1303 WPLM Refurbishment 2023	0.2
L1303 WPLM Inspections 2023	0.2
Line 1303 Structure Program (Multiple Assets)	1.4
Numerous TS Network Projects and Station Upgrades (e.g., Wabush Terminal)	61.2
