

1 Q. **Reference: Vol. I, Ch. 6, sec. 6.2, functionalization/classification changes (PDF pp. 176–178);**
2 **Vol. I, Schedule F 2.6E, Labrador Interconnected transmission rate base (PDF pp. 295–296).**

3 Preamble:

4 The 2027 Test Year reflects functionalization and classification changes implemented since the
5 2019 Test Year, including the treatment of Transmission Lines TL234 and TL263. IOC seeks to
6 confirm whether these lines are included in the Labrador Interconnected transmission rate base
7 and whom they serve.

8 Quantify the effect of any functionalization or classification change implemented since the 2019
9 Test Year on the transmission revenue requirement allocated to Labrador Industrial customers.

10
11
12 A. Transmission Lines TL234 and TL263 are not included in the Labrador Interconnected
13 transmission rate base used to determine the transmission revenue requirement allocated to
14 Labrador Industrial customers.

15 There have been no functionalization or classification changes since the 2019 Test Year that
16 have impacted the transmission revenue requirement allocated to Labrador Industrial
17 customers.
