

1 Q. **Reference: 2026 GRA – Volume 1, Section 1.3.1 The Electricity System**

2 Follow-up to LAB-NLH-011

3 Preamble:

4 In response to part a), NLH provides links to system maps dated February 12, 2024. These do not
5 appear to be the most up-to-date system maps. In response to LAB-NLH-030, NLH attached the
6 NLSO 2026 Annual Planning Assessment that includes system maps (Appendix A) dated February
7 2025. It is not clear whether these are the most up-to-date maps of the LIS.

8 Please provide (or provide a link) to the most up-to-date LIS and IIS system maps produced by
9 NLH that are demonstrably similar to those provide in the NLSO 2026 Annual Planning
10 Assessment.

11
12
13 A. The system maps provided in Appendix A of Attachment 1 to LAB-NLH-030 of this proceeding
14 are the most up-to-date maps of the Labrador Interconnected System.
