

Q. Reference: LAB-NLH-011

Citation:

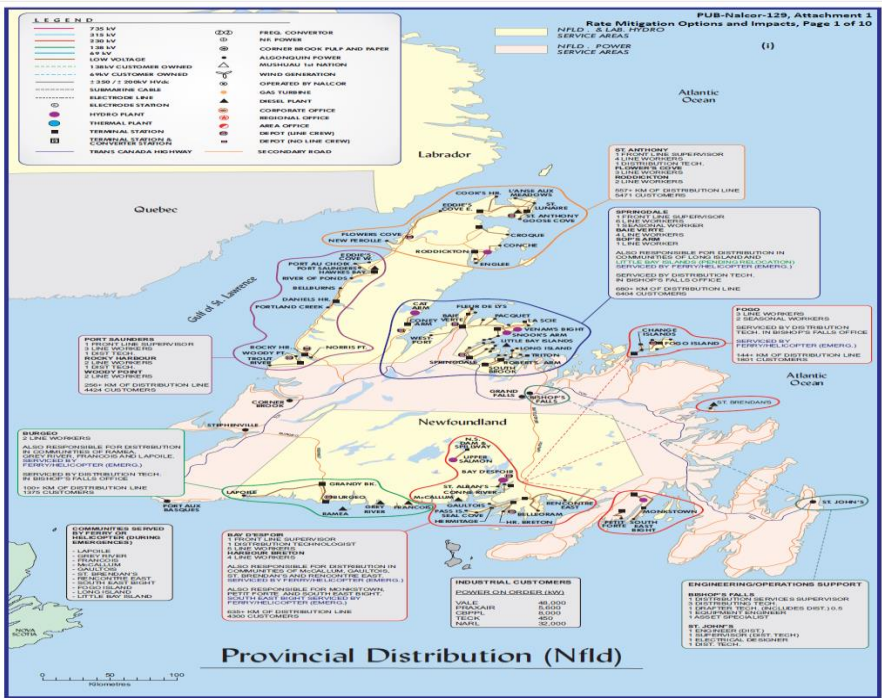

Hydro’s most recent detailed system maps are available on its website at the following links:

Newfoundland Grid: Provincial Generation and Transmission Grid; and

Labrador Grid: Provincial Generation and Transmission Grid.

Preamble:

The maps available at these sites are not responsive to the request. For greater clarity, the map referred to in LAB-NLH-011 is reproduced here:

a) Please provide detailed, up-to-date and separate maps of the LIS and IIS networks, similar to the one found in the Preamble, including the following:

- a. Geographical details, including municipalities, First Nations, waterbodies, etc.;
- b. Transmission control regions (e.g., NLSO, NLH, NP, etc.);

- 1 c. All transmission lines, including voltages, type (AC/DC), asset identifications (e.g.
2 L2304, etc.), ownership (NLH, LTC, NP, other) and operational status (e.g., if
3 decommissioned or inoperable);
- 4 d. Interconnections with other provinces;
- 5 e. Substations, including type (e.g., terminal, switching, electrodes, etc.),
6 ownership and operational status; and any
- 7 f. All remote and interconnected generating stations, including type, installed
8 capacity, and ownership.

- 9
- 10
- 11 A. Please refer to Newfoundland and Labrador Hydro's response to LAB-NLH-039 of this
12 proceeding.
