

1 Q. **Reference: Volume I, Section 5.7.2, NP-NLH-110 and NP-NLH-113, Issue Topic: Long Term**
2 **Supply Cost Variance Deferral Account.**

3 Based on the allocation methodology outlined in Table 5-13, please estimate what portion of
4 the \$179,874,420 balance in the proposed Long-Term Supply Cost Variance Deferral Account as
5 of December 31, 2027 is forecast to be owing from Newfoundland Power's customers. Please
6 also explain how Hydro intends to recover this balance, such as through its internal sources
7 and/or through customer rates.

8
9
10 A. Please refer to Newfoundland and Labrador Hydro's response to NP-NLH-178 of this proceeding.
