

1 **Q. Reference: Response to PUB-NLH-047**

2 **a)** Provide the data for each of the past 10 years identifying how often Corner Brook Pulp
3 and Paper has utilized Generation Outage Power.

4 **b)** Please describe the compensation provided to Hydro for the provision of Generation
5 Outage Power and provide illustrative calculations.

6
7
8 **A. a)** Newfoundland and Labrador Hydro ("Hydro") reviewed Corner Brook Pulp and Paper
9 Limited's ("CBPP") Generation Outage Power usage records for the past ten years. During
10 that period, Generation Outage Power was only utilized in February 2019. The February
11 2019 billing included 959,023 kWh of Generation Outage Power.

12 **b)** Pursuant to the Power Service Agreement, CBPP may take Generation Outage Power at
13 Board of Commissioners of Public Utilities-approved Interruptible Demand and Energy rates
14 when such service is provided. Compensation to Hydro is therefore provided through
15 payment of the applicable interruptible rate in effect at the time the Generation Outage
16 Power is supplied.

17 During the February 2019 period, CBPP received 959,023 kWh of Generation Outage Power,
18 which was billed at the Holyrood Rate of \$0.16010/kWh, resulting in a charge of
19 \$153,539.58.
