

1 Q. **Reference: Response to PUB-NLH-117**

2 What is Hydro's plan to deploy the new genset dispatch technology in its remaining diesel
3 communities?

4

5

6 A. The new genset dispatch technology will be implemented in some of the remaining plants
7 coinciding with other planned genset replacement projects in order to minimize project costs.
8 Planned locations include Grey River, Postville, Black Tickle, and St. Brendan's. Once these are
9 complete, Newfoundland and Labrador Hydro will evaluate the remaining plants and determine
10 if a cost-benefit analysis supports an upgrade.
